Dashboard Analytics

The screenshot shows a REST client interface with a GET request to `http://localhost:7000/api/meetings/dashboard`. The response body is displayed in JSON format, showing a successful status and dashboard analytics data.

Request:

- Method: GET
- URL: `http://localhost:7000/api/meetings/dashboard`
- Body Type: JSON

Response Body:

```
1  {
2    "success": true,
3    "data": {
4      "totalMeetings": 51,
5      "totalActionItems": 100,
6      "totalDecisions": 100
7    }
8  }
```

Pagination Page 1

The screenshot shows a REST client interface with a GET request to `http://localhost:7000/api/meetings?page=1&limit=5`. The response is a JSON object with the following structure:

```
1  {
2    "success": true,
3    "page": 1,
4    "limit": 5,
5    "totalMeetings": 51,
